My favorite app on the iPad now includes touch-up tools. The newest one that's completely unique is the Live Sharpen tool. Sharpen, Reduce Noise, Red Eye, Blur, Clone, and more. Even though you can do this in Camera RAW with some media, I can't get over the JOY of AR. I just love it. It is truly art to my eyes. 2 years ago, I was purchased Photoshop CS5 with the 30-day trial version. After that I format my computer and moved on. Now I am downloading CS6 again. It's not just about the price. It's also about the new features and user experience that makes it an app worth having on the iPad Pro. After I got my first iPad Pro, I just couldn't get over it. Often, I want to quickly check my photos in the iPhone version. But I just couldn't do that. I envisioned a world where if I wanted to share something from my iPad, I can immediately preview it in my iPad Pro rather than simply simply sending the files. Through it all, I've learned some tricks, changing the sizing of my canvas and developing the touch-up brush and the liquify tool. The Touch-up Brush lets you blow up or reduce any blemish in a picture. I actually find that this feature in the iPad Pro version it takes my photo to a whole new level. Sketchbook Pro costs just about \$50 on its own, but of course, there are accessories options. You can get sketchbooks, pencils, and paper or a combination. It's a genius time and budget saver for artists, especially if you can get one for a good price.
